

EscapeE

Thank you for evaluating EscapeE - the PCL and HPGL viewer from RedTitan. If you want to try creating PDF files or use other advanced features you must complete the simple registration process. It's **FREE...**

Click **Register EscapeE** in the **File** menu.

Note: If you have problems viewing your PCL files contact help@redtitan.com for a free analysis.

Choose "**print to file**" in a modern Windows application HP PCL printer driver and view the output directly in EscapeE.

This example uses the **Laserjet 4550 PCL5c** driver and was created with **Word** on **Windows XP**. This driver supports **full colour** and downloads the Windows fonts required as TrueType and OpenType scalable fonts.

EscapeE will utilise any downloaded fonts for the screen view and creates PDF files containing the original fonts or substitutes them for Adobe defaults. This technology creates an excellent scalable screen view and high quality **Adobe PDFs**.
